

### MULTIPOINT INDEXABLE CROWN:

**Details:** A multipoint Diamond Dresser in which sharp natural diamonds are set in a circular rating plane. As soon as the diamonds on the indexed position are completely Adjusted on the shank for new points. Shanks for the crown are made to customer's specifications.

#### **Applications :**

- All types of large wheels where fine truing is considered important.
- Specially recommended for cylindrical grinders.

#### **Advantages:**

- The diamonds can be completely used up and resetting is redundant.
- Since two or more diamonds come in contact with the wheel the work load on the diamonds is divided and the diamonds last longer.
- A large area of the wheel is dressed more efficiently in a relatively shorter time than a single point.
- As several points are in use simultaneously the feed may be safely increased.
- Finer finish is obtained on the wheel due to the crystal shape of the diamonds employed.
- Can be used for side dressing.

#### **Sizes:**

- EM-24 with 24 Diamonds for wheel size up to 600 mm diameter wheel.
- EM-36 with 36 Diamonds for wheel size above 600 mm diameter wheel.
